**C**hurch Hill Landscapes is an award-winning gardening and landscape construction company based in Charlotte, Vermont. These talented, down-to-earth folks build outdoor spaces for everyone to enjoy.

Church Hill Landscapes is excited to announce electric mowing and solar-powered leaf blowing and string trimming—greener lawn care powered by the sun. Church Hill Landscapes now has a fleet of electric mowers that are quiet, eco-friendlier than gas, and lower maintenance. Recharged every night, the electric mowers are reliable for all-day service without recharge. When you replace a gas-powered mower with an electric one, it takes the equivalent of 200 cars off the road.

Solar power used in everyday life is on the verge of a revolution. And Church Hill Landscapes is on the front line with their new solar-powered commercial-grade string trimmers and leaf blowers, recharged with community solar. In one hour, a gas-powered trimmer can produce as many emissions as nearly 40 cars traveling at 60 miles per hour, making solar-powered trimmers the obvious choice.

Go greener in your own backyard by

swapping from gas-powered mowing to solar-powered and electric lawn care from Church Hill Landscapes—quiet, affordable, and now the most eco-friendly service out there. ✨
