

OREGON®

120V Professional Series™

GET YOUR HANDS ON MORE POWER

Cordless power has never measured up to the performance of traditional, commercial gas equipment — until now. The new Oregon 120V Professional Series is engineered to offer better power and torque than comparable gas-powered equipment with zero emissions and industry-leading low operating noise.

OregonProducts.com

120V Professional Series™

The next evolution of battery technology

Professional Grade Cordless Equipment

Finally, there's a line of professional-grade tools that offer all the benefits of battery, without sacrificing power, performance, or durability.

QUIETLY POWERFUL

Patented "Stealth Mode" setting allows your crews to run at full-speed without violating noise restrictions.

MORE POWER AND TORQUE

Engineered to offer more power than comparable gas-fueled equipment.

WEATHER READY

Water and dust seals on electrical connections and components, so the tools are ready for use - rain or shine.

INCREASED PRODUCTIVITY

Efficient power offers extended run times with no refueling stops, while ultra quiet operation allows early start times at noise-sensitive sites.

COMMERCIAL-GRADE DURABILITY

Tested tough to endure the rigors of professional use.
